>Follow on: Thank you so much for you insightful information.  
>I am an animal rights activist myself, but the question about  
>(foxes) killing more than they need was one of a very select  
>few I have not been able to answer. Thank you so much!  
>  
>A fox (female) regularly comes into my garden, day and night. The  
>other night (at about 5am) I was woken by the fox barking persistently  
>for about 20 minutes. She was sitting in the middle of the lawn, not  
>in distress, but making a lot of noise! Even when I put on the  
>security light she did not move, only when I walked down the garden  
>did she retreat, but continue barking at a further distance. I left  
>her alone as I was satisfied that she was not in distress, which is  
>what I originally thought. I would be interested to know why she was  
>doing this as she has never shown this behaviour before. I assume it  
>was either related to mating or cubs.  
>It could possibly be a vixen who will not leave her new born cubs for  
>too long so calls to the dog fox to bring her food  
>For six weeks we have fed a young vixen, three weeks ago she had four  
>cubs. We carried on feeding them, three days ago she vanished the  
>earth is secluded and has not been disrupted by anyone. Unfortunately  
>we have a lot of cats in the area, in the last few days they have been
