No one claimed we came FROM the apes. We came from the same same branch they did. You creationists claim we're a special creation – unrelated to anything else on earth.

Better yet, get off the net and service your wife like a good Jehovah's Witness husband on the dole. Leave this subject to those who know about evolution to discuss it.

Finzy.....

Jehovah God Himself.....

And the Lord God of Israel spoke to the man Santana, "Ye be steeped in iniquity, and ye revel in sinfulness, and every form of perversion is a thing of delight to thee. Thou shall be allowed your allotted time, and then I shall smite thee grievously, and cast thee into the lake of fire together with thine Master, Lucifer, where ye shall find eternal damnation together."

But the man Santana known as Jabriol was one of Jehovah's Witnesses, and so did not fear God, and worshiped demons, and continued in his wicked ways.
