You weigh 43 kg?

> McHenry calculated an estimated weight of 31.7 kg. for OH 8. There are

> many small examples for early Homo.

Sigh.

- 1) What do you know about the hairiness of OH-8?? ever seen one??
- 2) OH-8 is habilis, possibly apith, not Homo, see Wood etc.
- 3) OH-62 "habilis" had much longer arms than legs. Ape?
- 4) Calculations.
