How do you know early Homo had 20% sc fat, ever seen one?

- > 2) OH-8 is habilis, possibly apith, not Homo, see Wood etc.

And Potts with his new midget H. erectus, how do you explain that?

- > 3) OH-62 "habilis" had much longer arms than legs. Ape?

And Potts with his new midget H. erectus, how do you explain that?

- > 4) Calculations.

Ever seen a pygmy?
