

Marco vs Intelligent Design? Is there a place for Paul in ID?

I don't really think it should be Marco vs ID – they look pretty much hand and glove to me:

"The reason for this, of course, is that Science itself has an Establishment that resists change. The idea that there *might* be a hole in the boat of the theory of knowledge that drives Science is terrifying to an awful lot of mainstream scientists – at least that's what it looks like to me. Otherwise, they'd be happy to engage the IDers, disprove their claims, and merrily go on their way."

And I had to read this before coffee, too.

Jois
