Why  
not  
inform  
a  
bit,  
eg,  
my  
2002  
paper  
with  
P-F.Puech  
&  
S.Munro  
"Aquarboreal  
ancestors?"  
Trends  
in  
Ecology  
&  
Evolution  
17:212-7.  
Just  
google  
"aquarboreal".  
:-)

:-)

Re: Bipedal P & G

Yes,  
if  
you  
want  
endless  
question  
marks  
and  
silly  
information  
on  
how  
mountain  
beavers  
are  
semi-aquatic  
animals,  
by  
all  
means  
see  
TREE  
2002.

Said the SF  
whose  
ancestors  
ran after  
antelopes.

The savanna freaks have the  
hard evidence....cut marks  
on antelope  
bones = savanna living  
niche.

Yes, on riverbanks, forgot??

Funny you can't cite this....you made it up. Getting pretty  
desperate  
aren't you?

Re: Bipedal P & G

??

You made the claim, you prove it. The only thing you have proven so far is you have a vivid imagination: savanna runners after antelopes... :-D

.
