Why does he need a full wet suit and goggles? :-D

He doesn't. Would you backfloat naked in front of a video camera for distribution on the internet? I wouldn't either.

This is weak, even for you.

I answered your weak question.

Naked? They guy could just wear trunks.

So?

And your lame excuse doesn't explain the head piece OR the goggles.

Re: "Sea Otter feeding in Red Sea"

Re: "Sea Otter feeding in Red Sea"

excuse? The guy is skinny, wears thermoinsulation, because he's in the middle of a diving session (most likely). There is a learning curve to diving without goggles, but the Moken kids (and some European) traditionally dove without them, when foraging for seafood, trained to see tiny objects far below surface.

As Marc says, we are no longer aquatic to the same extent as our ancestors were, largely due to technology and trade.

.
