Here it is, sportz fanz, the whole DAFN_Nation defective genetics exposed. Nationwide average, and everywhere in the nation, DAFN scorz are inferior. In a few places, the 4th grade whites even are smarter than the 8th grade DAFNz! Could all these school systems be so equally poor? No! The only possible valid explanation is defective DAFN genes.

Oh-oh, I know what you're thinkin': the DAFNscorz reflect an average level of poverty widespread among DAFNz compared to whites. This feeble excuse is frequently offered by "educators" when they profess not to have any other clue how to fix it.

But, actually, that fits perfectly with *genetics* being the cause. Intelligence is inherited and dumb folkz don't have much in the way of earning capability, thus end up poor. And these same dumb folkz pass on their dumb genes and beget dumb kidz. And those dumb kidz produce the deficient DAFNscorz shown below.

Thus, it all fits with a genetic explanation.

The reason for the low DAFN scorz isn't because the kids come from poverty, it's because their dumb parents, from whom they inherited the Genes_For_Dumb, were themselves dumb and had low earning capacity.

Notice also that whites, being smarter, have fled Atlanta and DC public schools to avoid having dumba## culture and values inflicted upon their children. Is that racist?

These data are for 1997 which is apparently the most recent year for which the DOJ has the figures fully worked up. The same table has comparison data for 1991. For 1997, the DAFN figures are a few percent higher and white figures a few percent lower. Extrapolating to today, DAFN incarceration would be approaching 50% of the total prison population, a shocking and disgusting track record of crime and violence when you consider DAFNz are only 12% of the total population.

Shocking, just shocking...
