Awesome resources! Very good stuff. I can see you are an AWAKENED one...

Children who do not pay attention get run over by cars. It is time to pay attention, folks, before the Jews run over all of us.

NO MORE WARS FOR ISRAEL!!

Read ONE book if you really care about this issue: Kevin MacDonalds book:

A Culture of Critique: An Evolutionary Analysis of Jewish Involvement in 20th Century Academic and Political Movements.

It is Just a book of facts -- what are you smart folks afraid of?

He doesn't even mention Jewish media control at ALL in the text. The revised preface to the paperback edition does cite some facts about this.

Kevin has said it was a process of gradually waking up to the reality of the issue, which is why this new preface is included in the new paperback edition.

go to Amazon.com and get the book, or get it from your local library to read. I mention Amazon, because after reading it you will want a copy to keep. It tells about how they built our modern matrix -- complete with international bankers sucking out our energy. Allan Greenspan is not the Fed chair for nothing he is a JEW.

They are enslaving and destroyng us.

Another good book is "IMPERIUM" by Francis Parker Yockey (pen name Ulick Varange). It is a good introduction for clearly thinking about politics. He was a lawyer who was chosen to go over to the Nuremburg trials after WW2, but quit and fled to write this book about what a

horror that whole charade really was. He had his passport revoked and died under mysterious circumstances in jail in San Francisco when he tried to enter the US there. His life may very well have been worth writing that book -- very very good.

These books are like RED PILLS. Choose them if you want to save the future and free your mind!

>*The presently prevailing views concerning much of social reality and recent history is a result of influence over the major mass media in developed societies, especially America, during the last several decades by individuals who were (are) Jewish.*

>

>*Through control of the media and, so, the flow of information, those having this control have – both consciously and unconsciously – concocted an extremely warped 'reality'. A major intention of this 'reality' – an intention probably held unconsciously for the most part – has been to bring about damage to or the elimination of white societies and the white race. Because views and information that refuted or did not support this 'reality' have been suppressed by way of this same media control, then this 'reality' has been generally accepted as true and legitimate. The advent of the internet has made the flow of information much freer. So, truthful knowledge concerning recent history and certain societal considerations is rapidly propagating.*

>

>*Most people have simply accepted the views and ideas put forth by the mass media – and, by extension, by governments, colleges, religious organizations, etc. I urge those of you who have not already done so to at least consider the other side of the issue. Then you can make determinations about what constitutes reality with a more extensive base of information.*

>

>*For those of you who believe the media's presented 'reality' to be legitimate, acquiring truer knowledge and a better grasp of reality – actual reality – will change your entire view of the world and of life.*

>

>

>*So, I would like to suggest the following articles and books. These are but a small, though very important, sampling of a large body of excellent work that present the 'other side'.*
