Don't know. My Netscape reader won't delete them either even though I flag them to be removed. I generally have to set the expiration date and then manually clear all expired messages at once when I start getting errors like:

"Error!  
newsgroup server responded:No Such Article In Group

Perhaps the article has expired  
<[cvhvf401qrr@enews4.newsguy.com](mailto:cvhvf401qrr@enews4.newsguy.com)> (234249)  
Click here to remove all expired articles"

Of course, the error is misleading since they are not expired on the server, as I can still see them in Google Groups.
