Hello from Spain,

I've written a post about the Neanderthals that are in all of us, and if you ever get to read it, I would beg for your invaluable opinion.

Neanderthal vs. Cro-Magnon

<http://lasparanoias.blogspot.com/2006/08/neanderthal-vs-cro-magnon.html>

It's too long to post it here.

This is an excerpt:

"Scientists nowadays, argue on whether interbreeding ever took place between the two races.

I am no scientist, but to put things into perspective, we need to take into account that all throughout History there's been copious evidence involving descendants of the most superior and civilized Cro-Magnon race, inflicting forced sex upon chickens, goats, horses, snakes and just about anything that moves, from several animal species, including fish or insects, plus more than a few episodes involving members of the Vegetable World.

It won't be too far off to think then, that there could have been some kind of interbreeding during the more than 10,000 years both races shared habitats. In fact, I am absolutely convinced that members from both races engaged in monumental orgies."
