<
 TRUE SCIENTIST PROVES ED CONRAD RIGHT

<
 The following was posted by Lin Liangtai of Taipei, Taiwan,
 the only scientist in the Milky Way Galaxy who has
 xamined and HONESTLY tested the petrified bones,
 etc.— SOME HUMAN — discovered by Ed Conrad in
 the anthracite region of Pennsylvania over the past 27
 years.

<

< Read the entire blog or just the summary:

<

=====

<

THE CONCLUSION

By LIN LIANTAI

Taipei, Taiwan

<

The author has examined through microscopes more than 20 thin sections cut from "rocks" that Mr. Ed Conrad discovered and sent to the author.

<

Without exception, they are all found to be fossils, including the subject "calvarium fossil"

<

<http://www.edconrad.com/pics/OldestHumanSkull.JPG>

<

The object is a Carboniferous human calvarium fossil for the following reasons:

<

(1) it contains fossilized osteocytes, Haversian canals, osteons, red blood cells and various blood vessels in the specimens and thin sections ;

<

(2) it contains remains of pyramidal neuron, neuronal soma and dendrites;

<

(3) No other animal has an organ or body part that matches its inner/outer shape and size;

<

(4) Its inner cavity has a capacity of at least 1,025 cc.;

<

(5) It was found between coal veins near Mahanoy City, Pennsylvania, where geological structure has been dated to be around 300 million years old.

<

Some of the fossil's blood vessels have turned into coal, suggesting it once existed in a coal region.

<

Even if it had not come from the Carboniferous age, the fact that it is fossilized and coalified would have till made it the oldest human skull cap ever found in the world.
