In sci.archaeology, Eric Stevens created a message ID news:3vkg013r5mk2nrpap1i9i987orpki3htt@4ax.com:

> *What's that got to do with my criticism of what **you** wrote?*

Everything, you implied that the authors of the book could be confused as wantedly misrepresentative. See this is what I don't like when you are directly confronted on what you say you become evasive, as if people don't remember. Your specific critique of that book is what will catch the eye of anyone who read it, no matter how cleverly you try to disguise your accusation, we know what you meant.

> *But you are not citing a peer reviewed source. Not even the article by*
> *Gullov in the book was peer reviewed, was it? You tried to trump*
> *Michael Zalar's sources with a superior source of your own.*
There is
> *nothing wrong with quoting Gullov but there is everything wrong with*
> *claiming it was peer reviewed.*

Others have their sources of information. Truth lies at the intersection of valid perspective, science is not composed of only one perspective but many. You don't claim one guy is villainous simply because he offers a perspective based on sound information he is most familiar with even if it disagrees with yours. You have to take information from all sources and try to synthesis a 'best guess' approximation of science. Provided that Zalar can anchor his sources to the same relative degree as other professionals

> *End of this. You've been caught out and nailed. I need say no more.*

The ultimate diversion here.

Re: Spirit Pond, Maine

sci.archaeology: Re: Spirit Pond, Maine

> *Take him down* :-(

This is supposed to have some meaning?
