Dridle or driddle. Sorry but as a dyslexic person I make such spelling mistakes no matter which language I use. <...>

My English is not always as good as I would like it to be. In spite of some research on that word I don't know what it means. If you could provide an explanation or a translation to Swedish I would appreciate it.

This is of course an example of another of my faults: I have a tendency to get stuck on totally irrelevant details that usually are OT.

Lisbeth.
