You know Tom, if Inger was having any success at what she claimed she might actually know what she is talking about, right.

All the institute does when they think something is going on illegally is to block an IP, it happens all the time, they have a computer connected to the routers and they simply shut down a connection. My IP has never been blocked, but if you should note my IP is not from a educational institute, has not been for quite some time.

I'm not saying there is any causal connection but I have long wondered whether or not it was entirely coincidence that you stopped posting from your 'educational institute' at about the last time that Inger was making such a fuss about you.

Going back through my archives I find that the last post from your 'educational institute' was 15 May 2004. For a long time after that you appeared to have used a number of hosts, including one with a dynamically allocated IP address. Since 17 Dec 2005, under the ID of 'prd' you have been using a host with the the fixed IP address of 12.73.57.218 although you continued using Philip Dietiker on the same IP address until 15 Feb 2006.

It looks suspiciously as though while you might not have been blocked from all Internet access some higher power has stopped you from bombarding the news groups with your views from your place of employment.

How is it possible you think for them to block my posting to the UseNet when I don't use their ISP to post? Oh well, since I have

Re: OT – to whom it may concern

tried to elevate the mdm in many regards and have failed, I let her go on, but to be frank, sending complaints to a institutions IT– security people who currently don't have a usable NNTP serve
