##minty's message didn't  
make it to my computer. So  
this one for  
him/her. I

There are few girls on the groups as it is.  
Count me in.

have presented and will  
continue to present  
background knowledge and  
none in this group has up to  
now presented so many  
references both  
to Archaeologists works(of  
course mostly Swedish  
ones) and to other  
works where the  
background for findings and  
reports from Hudson Bay  
to the Black Sea has been

## Re: OT Dyslexia and writing

linked with existing documents contemporary with the datings. IF there are people here who are incapable of seeing the picture, I can't help them. Others here and elsewhere do. IF there are naysayers here who want to abuse because they believe that all important information from background up to edited peer-reviewed articles must have been edited in English, then it says more of their lack of skill in the field they discuss than about me and mine! IF there are people here who don't want to do the needed background reading and only want to lean to other scholars' opinions/conclusions/assumptions etc, then they are the one who have problems.

Having many bolls in the air doesn't mean what ##minty believes, but that's ok I will show what I mean in the combined case Ivar Bardson – lawman Paul Knutson and lawman Hauk Erlandson from later period and the Leif Eriksson – Vinland – Newfoundland and the rest of NA on the other. What's been sadly forgotten also by scholars of archaeology is the fact that there aren't one but many tellings about the Vinland voyages. Some in Sagas,

Re: OT Dyslexia and writing

some in Annals, some in  
Diplomas, some in  
religious documents. That  
they missed what most  
scholars of History  
missed, the fact that the  
earliest mentioning of  
Vinland in west  
doesn't origin from Norse  
nor from Adam of Bremen,  
well that's an  
other story which I am not  
will reveal before I print it.

Inger E

I'm sorry, perhaps English isn't my second  
language too, but, are you  
saying you're writing a novel book about  
those events? Can you tell me  
if it will be in Swedish, or in English, as I  
speak no swedish at all,  
to my constant distress. Takk – or is that  
norwegian? Or is it tag? No  
that's German for day, surely.

For both of you 'ladies', this may be helpful:  
<http://tinyurl.com/2jxmp>

I couldn't find Tak. I did get a tagg, but I don't smoke.

<http://tinyurl.com/mbsco>

I will have to tackle with that soon.

## Re: OT Dyslexia and writing

There's a certain facundity that a tyromancer could find hambling. But I shall take a deambulatory diversion here with great delight and yikker at ye goodness. Ah, abask with fortitudinous serendipity, we must forge ahead with the acanaceous issues.

Sorry, hit the wrong key combo and sent it off!

We all have had times like that. I had a notebook computer a while ago, but it was very inconvenient especially when you're used to the large desktop ones. Everytime I pressed the wrong key, the number pad was on, and by the time I'd noticed, several lines of writing had to be redone. Besides, they heat up rather quickly.

"##minty.." if you going to learn about Swedish, it would be better to get it from real books. Amazon sells them. I've been trying to learn Icelandic, but its very hard. The Scandinavian languages tend to be very heavy on grammar.

I watched the Jules Vernes story on tv a few weeks ago. Journey to the Center of the Earth starring James Mason as Prof. Lindenbrook. I adored the duck (Gertrude) who came to a tragic end and caused the undoing of the villain. There was a character Hans in that who was Icelandic along with Mrs. Prof. Gorteburg. I found the language quite liltng, but some of the sounds were quite hard (in my mind, at least) to pronounce.

Icelandic may be very extreme case, but I think its worthwhile if you want to learn stuff about the sagas too in their original form. If you live in Yorkshire, the University of Leeds has an Icelandic course. You can sign up for a 9 month diploma.

Dyl.

Thanks. I had a look at their site, and it seems that Icelandic is taught in the English department! See

<http://www.leeds.ac.uk/english/shared/areas/areas.php?file=iceland>

I'm quite surprised by that. I would expect something like Scandinavian Studies.
