Photo XX. The upper third of Loc 111, the Qumran substitute sanctuary, treated as their "Holy of Holies".

Photo YY. The carved pillar bases giving the cubit measure.

Photo AAA. The windows overlooking both sides of the substitute Holy of Holies.

Photo BBB. Outside the east door of the sanctuary. Quarter circle of stones for the prince to meet pilgrims. The papers are on the remaining support of the steps, which were removed by the archeologists. The round well in the foreground.

Photo CCC. The recess between the steps and the eastern wall of the sanctuary, shown by the Copper Scroll to be the first vault for storing money.

Refute her if you can.

Refute what? the undressed stone suggests a bunch of hicks who were fanatics to live in such a place. I've read the fire & brinstone letters addressed to the powers that were in Jerusalem, and no doubt they were corrupt, but I dont see where the fanatics have ever made things better.

Just as today, the people in the "Holy Land" could not agree, using whatever they regarded as sacred text as the justification for hate and violence. And just like Waco & Jonestown, some moved out into the boonies to get away from that corruption, but bringing their own forms of it with.
