1. You've said this is common knowledge.
It's not to me. Can you
provide a useful reference, ideally one that
explains the issue on the
basis of real cranial differences between
your noggin and those of
Aussie Aboriginals?

Nope. It's only common knowledge to people who frequent
aussie bars in
the outback where there's chickenwire between the
aboriginal section
and the common section.

It would be politically incorrect for any scientist to do a
study on
the differences between the robustness of two modern Hss
skulls I
think.

So you have no scientific evidence.

Re: Homo Erectus Traits in Hss

How would I go about getting the scientific evidence? Smack an aboriginal upside the head with a fifth of Wild Turkey in a controlled environment??

No. You would start with a review of the available physical anthropology wrt Aboriginal cranial anatomy. For the hearsay story you report to have a scientific basis, you would have to show that Aussie Aboriginals' occ
