...
The "kelp highway hypothesis" first crystallized among an interdisciplinary group working at the National Center for Ecological Analysis and Synthesis. The study's other researchers include: Michael Graham of Moss Landing Marine Laboratories; Bruce Bourque of Bates College; Debbie Corbett of the U.S. Fish and Wildlife Service in Anchorage, Alaska; James Estes of the U.S. Geological Survey and the University of California-Santa Cruz; and, Robert Steneck of the University of Maine.

Thanks for giving detailed, additional information.

Moving on –

50,000 –55,000 BC

"North America

Principal Investigator: Theodore Schurr, Ph.D.

Institution: Laboratory of Molecular Anthropology

University of Pennsylvania

Philadelphia, Pennsylvania, USA"

After checking into Dr. Schurr's credentials, I am confident that scientific verification of a very early date for the peopling of the New World is there

Let's push back the peopling of the New World to at least 50,000 BC

Let's push back the peopling of the New World to at least 50,000 BC
for the taking off the Internet.

If any sci.archer would step in with pointers to this verification, it
would
be extremely helpful.
