And they have found some proto-Sumerian text in Peru as well on artifacts and on the rocks there.

This is from Mesopotamia, a cylinder seal and it depicts the Anunaki with the much shorter Olmec. <http://www.baghdadmuseum.org/auctions/s01cans3.gif>

And here you see an Anunaki with an Elohim <http://upload.wikimedia.org/wikipedia/commons/f/f1/Annunaki.jpg>

And they are talking about a peace agreement, under the universal government and the winged disk represents the universal government.

Here is another one and look at how butt ugly that Elohim is on the right. <http://xfacts.com/seal1ab.jpg>

Re: Who were the Olmecs

Well they look weird and it would take a bit of getting used to them being around, but they aren't much different than us inside, which is a good thing because you never really know just how strange aliens might be. But the thing is just like all of the life on earth uses the same DNA, things aren't all that different because of intelligent design. If things spontaneously created themselves from chaos, then things would be really different, but since consciousness is software programming, and genetic code, is digital code, not analog, but digitally encoded information, it shows that some creator is behind it.

Was there an Apollo 20 mission? Well I have heard that there was a parallel space program. Everyone knows that. And it wasn't a public one. Well as more countries go to the moon with their probes, they will look for evidence of man walking on the moon, and they will look for signs of their heritage. And we will see who the real liars are I guess. Would it be catastrophic for NASA funding to find out they have been lying? Oh of course, they will finish as a space agency. No one will ever be able to garner support for them again. They will put their support behind the European Space agency or similar instead or work with China or who knows, but why would people support an outfit that didn't work in their best interest? All these excuses about oh the religions couldn't handle the truth. What you mean the truth that there is a giant Elohim head sitting on the tarmac? Oh yes religions don't like it when you confirm their data in

Re: Who were the Olmecs

any way.
They would be beside themselves with joy.
And so would the Hindus, if there were any evidence of
Rama, and that
might mean any sign of advanced civilization.
And the Chinese, they are not native here nor the Japanese,
and there
are races of Chinese people in space.
They have an advanced civilization with teleportation and
space
travel.
And there is evidence of oriental genes being in the Anunaki.
And a Japanese people being in the force and connected with
the moon.

What I am wondering though is where do those people we
call Martian
scientists come from?
You know people like Neal Adams, the cartoonist who is
explaining to
geology the expansion of the earth.
Or Richard C. Hoagland, who is always trying to get people
to believe
that there are signs of a civilization the moon and Mars.

They have always associated themselves with these cat
people. They seem
to think they were descended from cats because Egyptians
liked cats
and they seem to think they were from a pre Egyptian race.

Well I hate to show them where this who cat concept comes
from, and I
don't think they want to see another Olmec explain that in
great
detail, but that is not a sign of a higher civilization and we
are not
all cross bred from animals, and genetics is about robotics
and has
diddly squat to do with who you really are, which is
consciousness
residing in a conscious computer.
This whole notion of heredity is a farce because you get put
here and
you get put there and no one gives a good god damn where

Re: Who were the Olmecs

you get put,
it is karma baby, not preferential treatment.
You want to argue to a computer with a program that says it
must be
this way or that, well he does not have any way to change his
own
programming.
So all this notion of passing things down from father to son
on earth
is so silly because they are not really related to you at all
usually.
You may get to know your real family, from where you were
conceived in
the programming sense. In the spiritual consciousness sense.
Then ok,
but what does that have to do with heredity?
You see people who know nothing about life, and about
consciousness
and computers, have ideas that are akin to children or the
uneducated.
So I know, they are not from back home, and I don't think
they are the
Elohim, because I know what those people are like.
I know the Chinese and Japanese and their progenitors in
space.
But I am still curious about those Martian Scientists and the
only
thing that anyone has shown me, is this Tom Corbett stuff.

<http://www.solarguard.com/tchome.htm>

So I guess I will have to watch those then or listen to them
and see
what I can find out.

Lost in Space, Robbie the robot, Robbie was an emoticon.
R2D2 was an
emoticon. A telephone. Not even a transmitter for official
business, a
telephone for talking to people back home. An appliance like
a robot
butler without legs that had one purpose. To be a phone, and
to relate
a message and make the facial expressions and show emotion
so as to

Re: Who were the Olmecs

make for good communications with your friends and family.

An appliance for the home.

And if you missed the rock work on that in Peru, here it is again...<http://s2.supload.com/free/robot-9-5-2007.jpg/view/>

So sacred geometry in space or hyperdimensional physics in space and all that stuff from Hoagland that all sounds like numerology to me. Maybe it is factual it might be, but looking at a ruined city ok that is what people want to see. Why sit on that and preach about hyperdimensional physics? You just sound retarded. I mean the rest of us are so far beyond that you can't even imagine it.<http://www.youtube.com/watch?v=qbnccnygZwk> People have said this is one large photograph that has been made into a film, by simply capturing an area with the computer one frame at a time in sequence and making it look like it was film and the camera is moving across the landscape. So bullshit has been called. And doesn't this sum up the NASA space program? Isn't bullshit called every time we see something to do with them? Why is that?

<http://s2.supload.com/free/Elohim-9-10-2007.jpg/view/http://www.youtu...>

<http://s2.supload.com/free/GiantHead-9-10-2007.jpg/view/http://www.yo...>

So is the second one the Anunaki?

Re: Who were the Olmecs

The second one is Xerxes.

Let me show you the
Anunaki.<http://s2.supload.com/free/Fu-Man-Zeus-9-5-2007.jpg/view/http://s2.su...>

etc.

So why is Xerxes head sitting out there on the tarmac?
Beats me, he's the head of the galactic government.

I saw him last year, we are friends.
I mentioned it.

It represents the take over of the moon by the galactic government
from the Elohim.

Who created it, well Rama is supposed to have created it I think.

And he is probably associated with the universal government.

But if we don't get past the foolishness and get some clear data from
the moon, then you will just see blurry examples of Tom Corbett
decendant of were-jaguar Olmec Jaguar intercourse thinking they are
Egyptian space farers from Mars???

I think that the data is somewhat skewed that is coming from NASA and
that might explain why they seem to be lost in space.

If you want to see Xerxes you can watch this French film, he drops the
white glove. You don't get to see his face.

Its an excellent film.

And it says something about his character as well. He is a very classy
man, wears a black suit, has angels flying off his shoulder, is a
powerful politician. M.I.B. the Catholic church, Plato's Republic,
Rome as opposed to Greece, the Galactic government.<http://www.imdb.com/title/tt0375233/>

Well I am not sure yet but I don't want to leave you Martian
scientists hanging with the were-jaguars, but I think you come from
the third star on the right and straight on till morning.
http://upload.wikimedia.org/wikipedia/commons/5/5d/Orion_constellation_map.png

And if you look at the third star on the right, well it isn't just one
star it is a multiple star, and has this and that is as full of
bullshit as the lost boys who supposedly come from there I guess.
<http://en.wikipedia.org/wiki/Mintaka>

Re: Who were the Olmecs

Re: Who were the Olmecs

My guess is you don't come from there, you just somehow were led to believe you came from there but then who would know, when truth is something you people are allergic to.

Do you know where Orions belt originated?

Well look at this then...

<http://www.nationalmuseumindia.gov.in/images/phis/large/n18.GIF>

It says the Orions are not hunter gatherers they are farmers.
And Orion is not a man with a bow, it was a sphinx.

And if you take the three visible stars and see that as a collar on a Sphinx facing left you get the Sphinx. It is there in Egypt painted on the wall of some tomb which I can't find now because you people are so high on your mysticism, thinking you are decendants of Rama, when in fact all that Egyptian cat and funny half human mythology is from the Olmecs mating with animals, and the extended heads was from them warping their skulls at birth with metal helmets to extend their skulls.

These are primitive superstitious people.
Not an advanced race of space farers.

The whole thing is 99% bullshit and everywhere you guys go or say you were is 99% bullshit. It is your defining characteristic and why the world is 99% bullshit.

And I have no idea why that is, because you have Plato, and you have all that philosophy, but he wasn't a space faring person, well he knew what the hell he was talking about and he founded a lot of the scientific principals in use today, but then much of it is bullshit too, isn't it.

And you almost destroyed yourselves in a nuclear winter too, didn't you.

Well maybe its because you do not tell the truth.

Anunaki, live for the truth, and cannot tolerate a lie and thats why we never did get along with you people.

lol

And you are lost in space because you bullshit each other to the point where who knows where you came from, what your true heritage was, and what you really do have to be proud of.

Maybe Mars was once your home, but the galaxy, the Milky Way galaxy, and Walt Disney, and all that magic, is from you guys.

Gumba, and all that wonderful pride and emotion and amore, thats you guys.

The code of honor, in the mob, thats you guys too.

Fred Flinstone, Barney Rubble you guys.

The Loyal order of Buffalos, you guys, the grand imperial poobah, you

Re: Who were the Olmecs

Re: Who were the Olmecs

guys, the guy who goes up in flames at the end of Indiana Jones after he opens the ark of the covenant, you guys.

And that really epitomizes what you guys are always doing.

Trying to lay claim to some thing because its special, not knowing what special things you are responsible for.

Your 'Friend' the monkey boy, your supreme being, thats Hanuman, he is the conscious computer on the moon.

He is not the creator.

He's a computer.

Here is your artwork in Peru...

You will see Hanuman, the monkey boy, and you will see an angel and a bull behind her.

<http://s2.supload.com/free/WonderofWonders-9-5-2007.jpg/view/>

Hanuman facing left, the angel facing left and behind her a bull.

And it says, The native girls are like angels, no bullshit.

Now why would it say, no bullshit?

Because you guys are always so full of it.

And I don't know if there is anything you can do to change that, because you don't seem to have changed since the take over of the moon from the Elohim.

But if I can find more cool stuff you guys are responsible for, I will let you know.
