I checked those error bugs from the web site, nothing about how it dose on me. I did download for the 7th time, the basic version and ran it. I got that fast graphics with the bar, then the screen with all the legal stuff on it, I click on NEXT and that's the end of it, the screen gose blank and the machine just sits there doing nothing at all. After 10 mins I hit the cont/alt/del and the box says the program is not reponding. So that's it for me. I don't understand why changing a hard drive makes a program unworkable, but it has, so I'll just dump it.
