HUBBLE WEBCAST ANNOUNCEMENT:

The following event at the Space Telescope Science Institute will be webcast live. Those watching the live webcast will be able to submit questions to the speaker via email. The recorded webcast will also be available for viewing online shortly afterward.

To view the webcast, you may need to download and install software. See the web site listed below a few days in advance for details.

Hubble Space Telescope Public Lecture Series
at the
Space Telescope Science Institute

Speaker: Dr. Massimo Stiavelli, Space Telescope Science Institute

Topic: Studying the End of the Dark Ages with HST and JWST

Date: Tuesday, May 3, 2005

Time: 8 PM

Place: Space Telescope Science Institute (STScI) Auditorium

Price: Free admission and free parking

Phone: 410-338-4700

Internet: http://hubblesite.org/about_us/public-talks.shtml

Hubble Webcast Announcement

In the very early universe, there were no planets, stars, or galaxies. Astronomers refer to the period after the Big Bang, and before galaxies began forming, as the "Dark Ages of the Universe". Dr. Stiavelli will discuss how the Hubble Ultra-Deep Field has enabled astronomers to begin studying the initial formation of galaxies that marks the end of the Dark Ages. Further studies with HST, and, in the next decade, JWST, will greatly expand our knowledge of this earliest epoch of formation: the beginnings of the magnificent astronomical gallery we see today.

Lectures on a diverse selection of cosmic topics are held the first Tuesday of every month at 8 PM in the STScI Auditorium, located at 3700 San Martin Drive on the Homewood campus of Johns Hopkins University. Admission is free and free parking is available in the lot across the street.

This lecture will be webcast live. The recorded webcast will also be available for viewing online shortly afterward. To view the webcast, you may need to download and install software. See the web site listed below a few days in advance for details.

Further information and directions are available by calling 410-338-4700 or on the internet at:

http://hubblesite.org/about_us/public-talks.shtml

NEXT MONTH: Elizabeth Kessler, University of Chicago,
Art and Hubble
