Na, the car (I.E. Stealth Mad Max Machine) sits out front awaiting. Trouble with it IS the tags AND the price of GAS to run it! I am closer to the \$298.00 price of tags, as someone in the Cedar Rapids area made a very good donation and not a name anyplace to be seen! Whoever you are, ThankYou big time.

I did have to change all 8 plugs in the engine to try and get some more mileage out of it, and good thing too, I've never seen plugs in such a sad shape. It's a wonder it ran at all.

Na the old matter transmitter from the NCC 1701 just will not work without a warp engine installed.
