Hello folks,

I recently purchased a Meade LX 90. The scope arrived and was setup. This was the start of the problems, Meade failed to include the lens for the smart-finder. Contacted Meade and they received the lens.

I agree with Rod's assessment. I've had problems of the sort with an ETX which I solved by switching (external) batteries. The Autostar seems very sensitive to voltage supplied. A poor connection could cause similar problems.

Phil
