Read here somewhere about an amateur waiting on delivery of a 24" RC Optical scope. He's going to use it in his driveway. It costs what, \$60,000.00 for the scope & God knows what for the mount. This just isn't right, no one should be allowed to spend that kind of money for a personal scope. Even though I'm a Republican, I'd be in favor of legislation to watch for those kinds of expenditures and stop them dead in their tracks. The money should then be confiscated and given to the needy.

I want this kind of behavior stopped & I want it stopped now.

Throckmorton P. Gildersleeve

First, don't know how you found out about it but I do have a 24 RC on order but that's about all you got right about me. I have an observatory on my property in which I intend to install the scope which has been promised me the 3d quarter of this year. The mount was custom made and is already in place. Don't know what you mean by a RC "optical" scope as I don't believe RCs are used in any other

capacity.

Hey bud,

Good Lord man, RC Optical Systems is the name of the company. Surely you know where your money went.....if not, well, you just made my case.

Out of curiosity, which 24" RC are we talking about for \$60,000? I checked prices on new RC's and they are much higher than \$60k.

Is the person you have in mind buying a resale scope?

Anthony.

Think of the children, please, think of the children.
