"Gleaning Truth"

"Spiritual Evolution Self Realization Truth Seeker"

"The Cardinal Sin of Mankind is Mistaking the Apparent for Real"

When one spends ones entire personal and professional adult life on "Spiritual Evolution Self Realization Truth Seeker" one gets more than ample opportunity to observe the pseudo intelligencea seemingly continually endlessly inane prattle on preaching truth is a matter of opinion there is no right or wrong.

In one case a world famous purveyor of the mystical actually postulated it was ok to sell fallacy as long as no one complained. Kind of like selling the world is flat to the ignorant.

Yes, Yes, I've heard of opinion in fact the only thing I take seriously is, my opinion, pal.

Opinion however is often the last refuge of the superficial intelligencea. When they can not tell True from False they claim everyone is entitled to an opinion.

However unless ones opinion happens to be "True" it is just more subconscious baggage, also known as a hang-up.

If one thinks a thought that is not true or someone tells you a falsehood and one does not acknowledge to ones self that it is false ones subconscious believes it to be a truth and one must live with it as true in ones personal reality until one manages to get it out of ones subconscious.

Regardless of whether one can remember a book of statistics when one can not tell true from false, right from wrong one lacks real intelligence. Often the difference in the Sun and Mercury.

Galaxies make up universes. Universes make up Cosmic Spheres. Our cosmic sphere is the matter of which our sun is the center.

Before any education or understanding of astrology can take place one must first understand and agree on what is the Zodiac?

The Zodiac or Ecliptic is the physical PATH of the planets around the Sun.

Rather than being a philosophical matter of opinion this is plain old–fashioned Physical Astronomical Reality.

Regardless of how one attempts to rationalize any Misconception of this matter the Sun will still Rise in the East in the morning because the Earth is Rotating on its axis and Revolving about the Sun in its Fixed Sidereal Zodiacal Ecliptical Orbit.

To have any chance at all to get correct astrological information one must use the astronomical astrological zodiac rediscovered by Cyril Fagan using the fixed star Fiducial Point Spicka as 29 degrees of Virgo 6 minutes.

"Ancient Mistake Fools Millions"

"Cyril Fagan Rediscovered Fixed Sidereal Astronomy Zodiac"

The Astrology most often associated Western Civilization is WRONG and MISLEADING.

The fundamental problem stems from Classical Greek and Moorish Astrologers who translated the Zodiac they inherited from the ancient Egyptians and Babylonians incorrectly. Nothing has been right since.

However, in 1949 the modern day father of astrology the great Astrologer and Astronomer Cyril Fagan of Dublin, Ireland, (1896–1970) discovered the mistake. Modern SIDEREAL ASTROLOGY was born.

Before any understanding or education of astrology can take place one must first understand and agree on what is the Zodiac?

The Zodiac or Ecliptic is the physical PATH of the planets around the Sun.

The Zodiac is in fact Fixed rather than moving. The Zodiac or Ecliptic (the physical path of the Planets around the Sun) is NOT Moving for all practical purposes. The stars and space are sitting there and the Planets are orbiting through the stars and space around the Sun.

Rather than being a philosophical matter of opinion this is plain old-fashioned Physical Astronomical Reality.

Now we can get it right. To get correct astrological information one must use the astronomical astrological zodiac rediscovered by Cyril Fagan. Using the fixed star Fiducial Point Spicka as 29 degrees of Virgo 6 minutes Astrology is once again back in alignment with the physical reality of Astronomy.

SIDEREAL means measured by a star or physical reality. Using this technique the symbology again fits the delineation. The predictions are now correct. The timing of events is accurate. SIDEREAL ASTROLOGY. "Gramalkin®?©1970 V1–12.6"

Regardless of how one attempts to rationalize any misconception of this matter the Sun will still Rise in the East in the morning because the Earth is Rotating on its axis and Revolving about the Sun in its Fixed Sidereal Zodiacal Ecliptical Orbit.

The majority of the Predictive Technique is symbolized on the cyclic charts, including the solar and lunar returns. The return of the transiting (or current) sun and moon, to the same Zodiacal longitude they occupied at the time of ones birth, snaps a picture of the coming yearly and monthly cycle.

Utilizing the (fixed) SIDEREAL ZODIAC, the cyclic charts show the ebb and flow of daily life with amazing accuracy, clarity and consistency. The secondary progressed planets and primary angles, rather than being years off, show long–term cycles and some current events ON TIME. Given accurate birth data, the timing most events to within about Five Seconds is routine.

So now we KNOW that if you think you're a Taurus, you're probably not – there is an 80% chance you are an Arian. Think you're a Piscean, you're not – 80% chance you're an Aquarian.

The true dates of the constellations or signs go approximately from the fifteenth to the fifteenth of the month starting Aries at April fifteenth to May fifteenth and so on right on around the Zodiac.

The actual dates may vary by a day or so for a certain sign in certain years due to the leap year phenomenon. The Zodiac is constant however the calendar wobbles. Herewith are the approximate dates of the signs.

Sidereal Zodiacal Constellations or Signs Epoch 1950

Aries = April 15th; Taurus = May 15th; Gemini = June 15th; Cancer = July 16th; Leo = Aug 17th; Virgo = Sept 17th; Libra = Oct 17th; Scorpio = Nov 16th; Sagittarius = Dec 16th; Capricorn = Jan 15th; Aquarius = Feb 14th; Pisces = March 15th.

"Learning Tarot Modus Operandi (#5)"

"The Cardinal Sin of Mankind is Mistaking the Apparent for Real"

"Attention Pattern Manipulates Mystic Law Creating Experience
Attentions on God or Not"

"The allopathic psychiatrist must ask the patient how they feel
about it, the great reader tells them".

Each numbered article edition has new material added to it. The
highest number is the newest edition.

To be an efficient Tarot Card Reader one MUST have sight recognition
at least of the astrological cross–reference to the cards and have a
Second Nature Realization of the Intrinsic Values of the Planets.
Properly done this is actually quite easy as there are only ten planets
and seventy–eight cards.

When they can not tell true from false they claim opinion. Truth is
neither a matter of opinion, faith, awareness or agreement. Truth is
that which changes not, that which remains the same for all, in every
case, on all levels of being this side of vibration.

Astrology, Tarot, any of these techniques one is dealing with a set of
SYMBOLGY for the PSYCHOLOGICAL CONDITIONS one is dealing with. These
conditions show how we relate to things and therefore how things happen
to or for us, Mystic Laws of Cause and Effect, et cetera. Tarot Cards
(all cast lots) show the future for the way things stand now unless
something is done to effectively change the case at hand, which is what
we are about.

"The Intrinsic Value of the Planets"

For practical purposes the intrinsic values of the planets equals the intrinsic value of their corresponding constellation. Mars = Aries or read Aries as Mars et cetera. Yes there are the Solar Crosses – Cardinal, Fixed, Mutable the Fire, Earth, Air, Water elements and such however Venus is Venus and Jupiter is Jupiter every time.

The way to do the planets is to learn one planet a week or one planet a day if you are a quick study. The idea is to take them one at a time until each planetary intrinsic value is second nature to you without having to think about it rather than trying to learn them all at once.

"The Tarot Cards"

The easy way to learn the delineation of the Tarot Cards is to first learn the astrological cross reference to the Major Arcana cards then the Court Cards and finally each individual suit of the Minor Arcana cards. Waite Rider Mini and Albino and Agmuller Crowley Mini Tarot Card Decks are recommended. The words on the Crowley cards are mostly wrong. It's intrinsic values that count.

"The Major Arcana"

The Major Arcana of the Tarot is simply symbology for the planets and zodiacal constellations. Card numbers 0–21. Begin by arranging the Major Arcana cards in common order. Sun, Moon, Mercury, Venus, Mars, Jupiter Saturn, Uranus, Neptune, Pluto, Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius, Pisces.

With the Major Arcana arranged by planet and sign order it is much easier to get into the flow than when arrangement is scrambled via card number. "Gramalkin®©1970"–v1–7.6

The way to learn the card cross–reference of the cards to the planets is to use the flash card technique they use to teach children the alphabet. It is ever so easier to do readings when the cross–reference is second nature, unnecessary to check the cross–reference for every card in a multiple deck reading. One may just draw the cross–references in the border of the cards however by far the preferred technique is sight recognition. Just keep the list in front of one and go through the stacks of cards in order until by rote one instantly recognizes at least the planetary symbology for each card. E.g. The Sun Card = The Sun.

In fact one may do a pretty decent reading using just the Major Arcana cards as long as the layout is kept small, e.g. the Octoscope Layout which is nine cards yet pretty much covers it is pushing the limit. The minimum layout is five cards.

"The Court Cards"

The Court Cards are easily remembered by their Solar Crosses. The Kings are the Cardinal Cross. The Queens the Fixed Cross and the Pages the Mutable Cross. The Aces and Knights the element in pure form, Fire, Earth, Air, Water. The Aces are often the element Not in Motion. The Knights the Element in Motion also indicative of other people acting out ones problems via element, station, situation.

"The Minor Arcana"

Stack them up in order in four piles with the Court Cards by suit – fire, earth, air, and water. A, 2, 3, 4, 5, 6, 7, 8, 9, 10. Page, Knight, Queen, King. Take each suit one at a time and just flash card through them. The pattern of the Minor Arcana will soon appear.

"The Ritual"

In dealing with the actual mechanics of manipulating the cards first start with Grace from the Master and Angels. The most important part of the ritual. However, due to free will Angels generally refrain from forcing their help on one. One must ask for help to get it. The "Angels of the Light" are the ones in charge of getting the cards (the Cast Lot) in the correct Station (the Reader must delineate). For example: Master may I / we please ask you for your grace thank you. Please send Angels to watch over, guide, comfort, guard, protect, help us realize the truth, stay with us until it is taken care of, thank you amen Om.

Without this step one is just wasting ones time, as there is no way to know (even given proper mechanics) the cards are in the correct Station. This Grace process also clears any residual Astral Garbage or leftovers from previous readings hanging about.

To begin the reading first realize exactly what is the query and time period. Decide which layout or layouts are best suited to solving the type of problem, situation, query, or will provide the information one needs. Shuffle seven times. Always cut cards left-handed. Cut into three piles; restack to one pile, as you will then deal. When using the Reversed Card Technique (reversed cards equal lower self or negative manifestation) shuffle seven times, cut into three even piles, reverse the center pile, restack into one pile and shuffle seven more times, cut into three stacks, restack into one pile then deal. One may rub the palms of the hands together a bit then pass the palm of the left hand over the three stacks, feel the high, medium and low energy pile and restack to one pile high to low then deal.

On my desk one will generally find a hand full of "Rider\Waite" Mini and Albino Tarot Card Decks and a couple decks of Agmuller "Crowley" Minis. In my pocket a "Rider\Waite Mini". The "Minis" are used because of convenience. The cards are small so a

large "Layout" and or several "Layouts" may be done on a small table, and both the Crowley and Waite decks have beautiful pictures throughout. The Waite Mini Deck is proportioned like Tarot Cards, The Waite Albino Deck like Playing Cards.

One would say; first toss an "Octoscope General Reading Layout" with a Crowley. Then do a "Past\Present\Future\ Layout" to the left with a Waite Mini. Add a "Yes\No Layout" to the right with a Waite Mini and to the right of that another "Yes\No Layout" with a Waite Albino deck. This results in four Layouts on the table with each layout in a different deck of cards than the ones next to it so the decks do not accidentally get mixed together.

Angels can fly because they take themselves lightly.

Good luck, love, thank you,

Gramalkin

"Astrological Truths & Fallacies Revealed (#6)"

"Spiritual Evolution Self Realization Truth Seeker"

"The Cardinal Sin of Mankind is Mistaking the Apparent for Real"

Dearest Colleagues:

"Attention Pattern Manipulates Mystic Law Creating Experience
Attentions on God or Not"

The allopathic psychiatrist must ask the patient how they feel about it. The great reader tells them.

Each article edition has new material added to it. The highest number / date article is the newest edition.

Astrology, one would like to help ones colleagues and the general public understand how astrology and the mystery works.

One would prefer to refrain from hurting anyone's feelings. Hopefully this information will be received in the manor intended. This article will periodically be reissued in updated versions as necessary. This one is "Gramalkin®©1970–v1–7.6".

After monitoring the continual stream of misinformation drivel on the Internet astrology news and groups and in print this attempt is made. One can still hear the old man (Mazurek) now. "Self taught self–styled half–baked authority, read a book on Zen and think their Buddha, the blind leading the blind". About the shop we call it Cosmic Jive. Read the Resume page on www.gramalkin.com.

Granted it was very lucky to have been guided directly into the Cyril Fagan / John Mazurek / San Francisco School of Sidereal Astrology lineage. As the primary information Fagan taught Mazurek and Mazurek taught me is pretty much all on the website <http://www.gramalkin.com> this memo is short and focuses on correcting common astrological misinformation.

Anyone who would like to receive Gramalkin's newsletter simply email your email address to PublicRelations@xxxxxxxxxxxxxx Be sure to include Newsletter Please in the subject line to avoid accidental erasure of your request. The newsletter is an informal deal. It comes out periodically as case emerges.

The Gramalkin policy is to refrain from bothering with any argumentative, combative or debate scenarios about the mystery. It is take it or leave it and that's it.

"Gleaning Truth"

When one spends ones entire personal and professional adult life on "Spiritual Evolution Self Realization Truth Seeker" one gets more than ample opportunity to observe the pseudo intelligencea seemingly continually endlessly inane prattle on preaching truth is a matter of opinion there is no right or wrong.

In one case a world famous purveyor of the mystical actually postulated it was ok to sell fallacy as long as no one complained. Kind of like selling the world is flat to the ignorant.

Yes, Yes, I've heard of opinion in fact the only thing I take seriously is, my opinion, pal.

Opinion however is often the last refuge of the superficial

intelligence. When they can not tell True from False they claim opinion.

However unless ones opinion happens to be "True" it is just more subconscious baggage, also known as a hang-up.

If one thinks a thought that is not true or someone tells you a falsehood and one does not acknowledge to ones self that it is false ones subconscious believes it to be a truth and one must live with it as true in ones personal reality until one manages to get it out of ones subconscious.

Regardless of whether one can remember a book of statistics when one can not tell true from false, right from wrong one lacks real intelligence. Often the difference in the Sun and Mercury.

"Intelligent is as intelligent does" Moms Gump.

Truth is NOT a matter of faith, belief, knowledge, opinion, perception, awareness or agreement. The truth marches right along regardless of ones existence.

"Truth is that which changes not". Truth remains the same, for all, forever, in every case, on all levels of being this side of vibration. Data must meet this criterion or it is NOT TRUTH.

That which appears to be changes constantly. It's a nice day, an opinion. The Mystic Laws of Cause and Effect and Polarity a Truth regardless of agreement or awareness.

"The Science of Astrology"

Speaking of the muggles (non-magical folk) we know they are called MUGGLES as Gramalkin went straight to the top to get this information – Harry Potter. Now, as you guys know, you can fool most of the people all of the time but you can't fool us. We know everything we see in the movies is real, right pal? As we say about the shop "anyone who can fly a broom like that can't be all bad". So Muggles it is.

The muggles yet still prattle on about is astrology a pseudo or real science. Astrology is the original science and all the other sciences are a derivative of astrology. Astrologers for example invented astronomy in order to order to calculate their predictions of coming events.

The ancient Egyptians are credited with discovering astrology when once upon a time, long, long ago, they realized that every year as the full moon was rising amongst certain stars the Nile would flood and drowned everything.

As time went along the effects of astrological correspondences were

observed first on masses of people then on individuals. Astrology is actually a blend of art and science, the science of the spheres and the art of delineation.

The first page of the Bible God made the Sun to RULE by day the Moon to rule by night credentials astrology.

The pseudo intellectuals will gladly tell one that allopathic medicine is a real science. However allopathic medicine malpractice causes more deaths than all other untoward deaths combined. One death every three minutes just in the United States according to the San Francisco Chronicle/Examiner newspapers. That's REAL scientific all right.

One always enjoys watching the muggles attempt back up their big talk by disproving Sidereal astrology. Hot muggle tip, bring lunch and start with disproving an easy and obvious astrological prediction like this one. The moon delineates, as the public among other things, therefore there is always an increase in public activity during a full moon. If the pseudo intelligence understood it they would not call it The Mystery, "The Mystery of Life".

Indecently the Reader must protect oneself from Legal Harassment from the muggles of various types. One should get ordained. The Universal Life Church of Modesto, California (a very turned on church that uses church to actually try to help people) will ordain anyone upon request free of charge as well they should. We have so many centuries proof of the fallacies in the pay the Priesthood system of control. This legally protects ones practice under Freedom of Religion and from what ones patients confess to them. Also repeatedly many different legal authorities maintain that to protect oneself from whacko lawsuits ALL readers should (must) include the For Entertainment Only Disclaimer. As ridiculous and undesirable as this is best legal advice insists this is best legal protection.

To synthesize the cumulative last five or ten thousand years of astrological research on the part of many civilizations and therefore millions of people with the truth and falsehood sorted out of it cost Fagan one life, Mazurek one life, Gramalkin one lifetime and it is given to you for nothing. See details at www.gramalkin.com.

"Truth of Astrology"

Galaxies make up universes. Universes make up Cosmic Spheres. Our cosmic sphere is the matter of which our sun is the center.

Before any education or understanding of astrology can take place one must first understand and agree on what is the Zodiac?

The Zodiac or Ecliptic is the physical PATH of the planets around the Sun.

The Zodiac is in fact Fixed. The Zodiac or Ecliptic (the physical path of the Planets around the Sun) for all practical purposes is NOT Moving.

The stars and space are sitting there and the Planets are orbiting through the stars and space around the Sun, SIDEREAL ASTROLOGY. Sidereal means measured by a star, physical reality.

Rather than being a philosophical matter of opinion this is plain old-fashioned Physical Astronomical Reality.

Regardless of how one attempts to rationalize any misconception of this matter the Sun will still Rise in the East in the morning because the Earth is Rotating on its axis and Revolving about the Sun in its Fixed Sidereal Zodiacal Ecliptical Orbit.

To have any chance at all to get correct astrological information one must use the astronomical astrological zodiac rediscovered by Cyril Fagan using the fixed star Fiducial Point Spicka as 29 degrees of Virgo 6 minutes.

Sidereal Astrology is once again back in alignment with the physical reality of Astronomy. The symbology again fits the delineation.

The approximate dates of the Sidereal Zodiacal Constellations or Signs Epoch 1950.

Aries = April 15th; Taurus = May 15th; Gemini = June 15th; Cancer = July 16th; Leo = Aug 17th; Virgo = Sept 17th; Libra = Oct 17th; Scorpio = Nov 16th; Sagittarius = Dec 16th; Capricorn = Jan 15th; Aquarius = Feb 14th; Pisces = March 15th.

To see what a horoscope actually looks like view the Marilyn Monroe sample horoscope on www.gramalkin.com.

"Misinformation Revealed"

Most of the misinformation about the following items is the result of Tropical Astrology being so completely out of time, out of correspondence and incomplete. Using the primary Tropical technique (the sub-law of substitution) they tried to assign delineation to all manner of irrelevant things in an attempt to explain the constant flow of events that occur in ones life for which the incomplete Tropical system has No corresponding symbology.

The following items have Z E R O relevant delineation.

Asteroids; Comets; Using First Trade Charts to Predict Long Term Success; Tropical Astrology; Tropical natal 12 house system of delineation & House Rulers; Deacons; Part of Fortune; Moon Nodes; The Triplicities form of the elements – Fire, Earth, Air, Water in order

around the Zodiac; Exaltation & Fall; Retrograde is bad; Aspects being good or bad by nature; The cusps, such as being on the Aries / Taurus cusp; Midpoints Between Planets or between planets and angles; Harmonics; parallels; Natal, Progressed or Cyclic Horoscopes done for the place of residence rather than the place of birth. Celestial Latitude etc. Almost all data about planetary orbs; Geocentric & Heliocentric; Dealing with inner–personal relationships the inner–aspects between charts are more important than supposed harmonious and inharmonious signs and such; Other stuff will be added to this list as they come to mind.

"Notes"

What counts is the Intrinsic Value of the Planets and Angles, The Operating Law and the Sidereal Longitude (as a measuring Device). Read the "Book Information" page of www.gramalkin.com.

The technoids especially the ones that fail to grasp the big picture tend to try to drag all manor of mathematical what not into it. Essentially Azimuth, Altitude, Right Ascension, Declination, Equatorial, Apogee and Perigee, how close a planet is to earth, and so forth have nothing to do with astrological delineation. IT IS SIDEREAL ZODIACAL LONGITUDE THAT COUNTS.

What works are angular illuminated simultaneous aspects repeated on ones horoscopes file. Read the book information page on www.gramalkin.com for details.

When Stonewall Jackson's Secondary Progressed Primary Descendant transited his natal Pluto he was shot dead by his own troops and it did not matter what the RA of the left handed Moon Node was or how close the planet was to earth.

Here is an exception case example. Saturn is earthquakes. So one day I asked Mazurek how to tell what latitude the earthquake would occur With Saturn on the Midheaven. He said in the supplement to the American Ephemeris and Nautical Almanac there is a formula that will give this answer. However as far as delineating a horoscope it is strictly Sidereal Zodiacal Longitude.

The constellations / signs are more like TV channels than a radio dial, its either one or the other. There is no such thing as being on the cusp.

Corporations – To clock a corporation use the natal for the name, date, time, place of original incorporation. Must run a complete file. See the book information page on www.gramalkin.com. The time of birth is the time of day when the state official actually stamps the corporation papers for the ORIGINAL incorporation. Last notice was in Delaware all corporations become legal at noon. One would think this would make it easy to clock all the corporations legalized each day on

one chart. Obviously they will not all get the same results nor all be stamped at the same time. When athletic team incorporations change owners or coaches it shows up as current events on the corporations horoscopes file however the horoscope inner aspects effect current events and cycles also. It is an interesting case scenario. For example when Eddie D bought the San Francisco Forty Niners Football Team the team experienced a magical Camelot period. Camelot came and left with him, when he lost the team the team basically reverted back to its regular self. The horoscope for when one does ones first trade is just another current event chart. Partnerships have no natal chart, it is just the inner–aspected horoscope chart files of the partners.

Due to the Superior and Inferior Angles positive / negative polarity there is always some negative quality to the opposition aspect as one side of the aspect is an inferior angle (e.g. ascendant / descendent). The Square Aspect for example however may be all on the superior angles and may be good or bad via the intrinsic values involved in the aspect. Even so a Jupiter Venus opposition transiting ones natal Midheaven / Nadir would have mostly benefic results. A Grand Trine between Mars / Saturn / Neptune would have mostly malefic results. Again this is all explained in the Book Information page on www.gramalkin.com.

The effect of a retrograde is determined by the intrinsic values involved. Jupiter retrograding back and forth across ones ascendant is very good. Saturn retrograding back and forth across ones ascendant is very bad.

Horoscopes should be done Sidereal Zodiac, Geographic, Campanus House Cusps, Octoscope (Natal & Cyclic), for the place of birth.

There is such a thing as Local Natal Angles. The four main angles of the natal horoscope cast for any location aspected to ones natal planets and the incorporation natal of the town will show how that location will effect ones life condition. The local natal angles do not effect one while traveling. One must be someplace long enough to "set up a force field" say twenty–one days or so before local natal angles work. Transits do not effect local natal angles.

The Octoscope Watches are what have the delineation rather than the twelve–house system. On natal and cyclic charts reading for psychological makeup and conditions aspects are by sign and house and houses show high, medium and low energy levels – foreground, middle ground and background. The Octotopus is when one does not bother to compute the "Watch Cusps" and just uses the four main and four midpoint angles with the "East Point" angle of course. Click the book information tab on www.gramalkin.com; also view the Marilyn Monroe sample horoscope, which displays a full Octoscope.

The elements Fire, Earth Air Water, do not run in order around the zodiac. Example: Aquarius and Pisces are both watery. Libra the artist and lover an air sign intellectual?

The Ingress Charts are a valid modus operandi. Most especially the Capricorn Solar Ingress which is the most important ingress horoscope. Capricorn is the Lead Duck of our cosmic sphere. Our cosmic sphere spirals toward zero degrees of Capricorn. This is also where the bump or wobble is that creates the precession of the equinox.

The Cap Solar horoscope for the return of the transiting sun to zero degrees of Capricorn done for example the longitude and latitude of Washington, DC. USA delineates conditions for the United States of America for the coming year.

The Lunar Ingress horoscope for the return of the transiting moon to zero degrees of any constellation done for example the longitude and latitude of Paris, France delineates lunar return conditions for that location in the coming 28 days or lunar cycle. If one were in Paris the inner–aspects between the Paris Lunar Ingress and your personal astrological file would show how these events would effect you personally and so on.

The Mercury Ingress for the return of the planet Mercury into zero degree of any sign for any coordinates will show how the intrinsic value of Mercury related matters will effect that region for the duration of the planet through the sign and so forth with all the planets ingress charts.

The Hindu version of astrology does at least use a Sidereal Fixed Zodiac. India is said to be the mother of religion and India has been able to maintain the Guru line. They have some very talented people in India who could tell your fortune with a wink. However unless there has been a miraculous transformation their astrology is a mess. So much of their modus operandi and delineation is mythology driven rather than empirical scientific and their zodiac (or ayanamsa) is a couple of degrees off. As Mazurek always said "if it doesn't work at the racetrack it doesn't work in your daily life". Read the Mazurek obituary on the "Resume" page of www.gramalkin.com.

The Chinese version of astrology is of a Sidereal Fixed zodiac nature. However it is mostly a schematism rather than really astrology as shown by their "Year of the Dragon" scenario.

The way the cosmos works astrology functions under the Law of Correspondence of the Mystic or Operating Law the law of Analogy, the "Hermes Law" (as above so below, as on the inner so on the outer) also the Laws of System and Order and Cycles.

The celestial motion of the planets through the zodiacal constellations (see <http://www.gramalkin.com>) symbolize the world wide psychological conditions for the entire planet. It is when the celestial configurations (planetary transit aspects) fall activated on ones personal horoscope file of charts one will have the corresponding

event experience in ones daily life.

Properly done horoscope and tarot readings yield a realistic peak into the psychological / physical past, present and future. Astrology, tarot, any of these techniques one is reading a set of symbology for the psychological conditions one is dealing with that show how we tend to relate to things therefore how things happen to or for us, (Mystic Laws of Cause and Effect, Cycles etc.). Refer to a more detailed explanation on <http://www.gramalkin.com>.

Essentially as a result of the cumulative pattern of ones attention (ones Natal Horoscope or karma) the cosmos presents us with a stimuli. As a result of how ones attention pattern reacts to the stimuli the game is afoot. Our reaction to the stimuli is most important. One is being walked and breathed down the path. With free will one gets to direct ones attention pattern to anything.

The solution is always the same. "Attention Pattern Manipulates Mystic Law Creating Experience, Attentions on God Or Not". Read the Amateur Satsang, Self–Realization and Mystery Revealed articles on www.gramalkin.com.

There are only two kinds of people. At will at one with co–creators with God, or not. Unless one can part oceans, move mountains and heal masses with a blink a wink and a wave one is an "or not". One is an "or not" because one has psychological problems which must be addressed.

Now you know me, I am pro denial and cheerfully accept all excuses. In fact they always want to know Gramalkin how is it that you are the only one since Bible Job that it is not your fault, someone or something else is causing your experience?.....It's a gift, pal.

Keep meditating. Master may I please ask you for your grace thank you. Singing Om Om Om, Om Om Om Om, Om Om Om Om, Om Om Om Om, Om Om Om Om ET cetera all the time is a good start.

Good luck, and remember "Angels can fly because they take themselves lightly".
