The Questar 3.5 is still the most ingenious >scope made.

and one of the smallest.

When I read "Questar" in the subject line I never even thought of the 3.5. I thought of the 7 and the old 12. Now *those* are telescopes! :)

I have a friend who has owned a 3.5 since the early 1970's. Today he uses it mostly for planetary imaging with a webcam.
