[snip]

Rasalgethi (alph Her) 17h14m38s +14d23m24s 4.2 2.8,5.3

orange/green

Brian, didn't you state that RasAlgethi definitely has a separation of 4.6" in the "Magnification needed to split tight doubles" thread?

Which catalog did you pick that one up from?

Heh. Good catch. I got it from a list that a fellow by the name of Byron Matthews faxed me. I didn't check the separations when I typed it up as an ASCII file; I just copied the data. What you see is what I got. :)

But anyway, yes, all of my *printed* references say 4.6 arcseconds.
