Does anyone here know where I can find the old Excel spreadsheet that used to be available at the following link?

www.mapug-astronomy.net/AstroDesigns/MAPUG/ObsrList3.htm

It had the SAA 100 list, and a ton of other cool lists. I recently changed computers, and that file didn't make it over to the new system, but I loved it. Any help would be mucho apreciado.

Maybe it's me, but I can't get that link to work today, despite Google and Yahoo! turning it up in my searches for the spreadsheet.

Thanks!
