On the radio this morning:

<http://www.npr.org/templates/story/story.php?storyId=6655690>

The last sentence reads: "He and his wife built their house in a spot that's so dark at night, you can still see the Milky Way." Wow, that's dark ;-)

Heard the same final sentence. Didn't know whether to snicker or sigh. That said, it was nice to hear the alternative to the illuminate uber alles view.
