So, you own stock in them or work there?

No. But its a wonderful resource available to everyone. Many of the questions you ask could be answered there \ with just a few typewritten words and a click. Google isnt as good as it once was (too many ads now) but it is worthwhile and but than total ignorance.
Good luck –

Someone gave our museum a C-8 8" SCT. I thought I'd set it up, but immediately found a bolt extending from the tripod top without any apparent way to place the wedge on it. I noticed a long vertical shaft under the platform, and discovered one can raise a center pole up through the top. It has the bolt on the top. Maybe it'll dawn on me how to put this together, but I find this rather surprising. Can anyone give a clue as to

Re: Putting a C-8 on Its Tripod!?

why it's
designed this way?
