What do you guys think of the russian MTO-11CA 10/1000 Mak?
It's more expensive at \$475 versus the Orion 4" at \$319. Why?

btw.. here's the site of it

http://www.rugift.com/photocameras/mto_11_ca_lens.htm

Russians went to space first.. they created the first mak.. so their mak is the best? Huh?

Looks like a Gregory variant of the Astro-Rubinar (a Rumak):
