What do you guys think of the russian MTO-11CA 10/1000 Mak?
It's more expensive at \$475 versus the Orion 4" at \$319. Why?

btw.. here's the site of it http://www.rugift.com/photocameras/mto_11_ca_lens.htm
Russians went to space first.. they created the first mak.. so their
mak is the best? Huh?

Looks like a Gregory variant of the Astro-Rubinar (a
Rumak): http://www.rugift.com/photocameras/rubinar_1000_lens.htm <http://lzos.ru/en/index.php> <http://www.cl>

Ed T

Maybe you can sell your Astro-Rubinar to me? How
much? you can email me in private. You deserve the
Intes or Astrophysics Mak. What are you doing with
it with your millions worth of telescopes collection.

:)
