Knuckle Dragging Schwartz opined:

> *Vajk is ....*

<snip nonsense>

The distribution is primarily in the sci.\* hierarchy. You post bluster and nonsense when you attempt to post science, and the rest of the time it is tourettish outbursts. Even Varney, as twisted and childish as he is, abandoned your cause today.

Tell us once again how zero absorption means zero refractive index Al. That's the most recent blunder I called you on, and you're still mad at me for pointing that one out.

How about your infamous "diamond" project, Al? Where are the diamonds you were supposed to have fabricated in 2001?

"Uncle Al has proposed a direct chemical synthesis of single crystal diamond of arbitrary size, deposition of 1 carat/cm<sup>2</sup>-hr at ambient pressure. The first run showed deficiencies in the chemical understanding, which lead to Devil Solvent and Devil Solvent II in

sci.astro: Display of ignorance by 'Uncle Al' aka "Alan Schwartz" <uncleal0@ix.netcom.com>

the second run of experiments. That controlled the chemistry – no graphite! – but there were material engineering problems ("Alien," when the little darling bleeds). We have the third and final attempt budgeted and scheduled for 2001.

On 31 Dec 2003 you wrote:

"We have a new blank reactor head in hand and it seals to the old body. It gets drilled and welded in January, we shake down for leaks in a dry run, then we go for it. "
