AWWW, man "No Stars in the sky???"

Do you know anything about photography at all???? Even an amateur photographer knows why. Try it sometime, right here on Earth.

That alone is enough to dem0nstrate your whacked out claim is kooky, but I shall continue thusly:

Second, please account for the fact that in the late 1960's and 70's there was a cold war. The USSR and the US were in a space race, and in fact a political race to prove who was the better society. Each side took every opportunity to embarrass the other (never mind the French, etc). The USSR was losing, and DID lose the race to the Moon. Yet, if as you claim the US faked Apollo 11, the USSR kept quiet instead of leaping out and taking the opportunity to show the US faked it.

Before you use mental gymnastics to maintain your position, think about Doppler drift of a spacecraft orbiting the Moon, the communications thereto, the fact that the USSR had an expansive spy network, as well as "trawlers", and now account for the Laser Reflectors, and the ALSEP packages. (The laser reflectors are still used today, BTW)..

OK, NEXT!!!
