No, you post through an anonymous remailer because you are a troll and a criminal who doesn't want to get caught. What you have yet to figure out is that when you fuck around with federal government computers like you obviously have, they can get a subpoena in the blink of an eye and get your personal information from the log files of that "anonymous" remailer. It doesn't take

the NSA to find you. It only takes a court order, dude.

So what you are saying is that not only are you a troll, but a pervert as well. Why you make such incriminating statements about yourself is a mystery, except that I know that many criminals think they can't get caught and so often brag about their crimes. So what other illegal activities are you currently involved in, Johnny?

Keep believing that, Johnny boy. That's exactly what we want you to believe.

Careful with that ego, or you will burst it and get it all over your monitor. Why you believe that you are the first to consider that Mars may have had, or may still have water is an indication of your delusions of grandeur. Take a pill, Johnny.
