So as well as being an idiot, you are also a thief.

How would you know it's microbial mats? You are just wishing it were so.

> *But not evidence of life, as NASA has publicly stated.*

When? Where? Please quote this reference.

(And don't just give me a url – take the effort to copy or retype the actual quote, and footnote it as if you are doing real science)

If they wanted you to have the data, you would have access to it. Obviously, they also think you are an idiot.

Your eyes haven't strayed farther than two feet from your couch. There is no clear evidence of life on Mars (yet).

sci.astro: Re: NASA Claims No Life On Mars and Embargos Mars Rover Data.

I contribute by debunking your insane blatherings.

- > *Do you actively debunk Global Warming*
- > *and stem cell research too?*

We need Global Warming to counteract Nuclear Winter :)
