Dear incest cloned borg 'Vanilla Gorilla (Monkey Boy)',
And the beat goes on and on for the likes of incest cloned borgs
without an actual brain of their own.

Obviously, since Lord GOOGLE has taken over the likes of DEJA and
whatever else suites their information superhighway that leads directly
into the bellies of NSA/DoD/CIA and MI6 agendas, and as such GOOGLE (as
clearly stated within their charter) owns the rights as to display
whatever and within whichever format suits their DNA cloning pecker's
best interest, therefore it's not at all surprising that individual
computers and/or of their user IDs are being thoughtfully treated as
per receiving individually customised pages when and wherever need be
(at least I'm fairly certain that's exactly what a certain Pope that
was after Cathars and that of Hitler having a fetish for tormenting
Jews beyond the point of no return would have wanted).

Thus we have the GOOGLE WYSINWYG V-Chip swinging into hyper-action if
you're on their anti-mainstream crapolla list, and/or it's possibly
even WYSINWYG V-Chip automatic 'nondisclosure' filtering that's
enforced entirely on your behalf, that is if they're actually doing you
a big ass favor by way of excluding whatever evidence that might
otherwise get you and anyone associated summarily terminated in more
ways than just unplugged.

It's actually damn nice of the Usenet God to be doing such warm and
fuzzy favors on your sorry dumbfounded behalf, and it's even nicer if
that Usenet God somehow managed to accommodate others in their
stealth/WMD mode as having special benefits in spite of their only
intent being that of author/topic stalking and summarily bashing of
those outside of their mainstream status quo box. Of course, this is
one of those Texas style 'high standards and accountability' boxes that
was responsible in part for supporting their very own Skull and Bones
'so what's the difference' policy that brought us into 9/11 and,
perhaps soon to follow will be the necessary amendment that's to become
'up yours', which shouldn't be all that far behind (if you know what I
mean).

sci.astro: Re: MAILGATE sucks, or at least NSA/MI6 sucks

It's always nice to realize when there are cloned do-gooders like the GOOGLE's V-Chip applied technology wizards making the very best possible usage of those spendy NSA/MI6 parallel processing computers.
