So, you're smart enough to figure out that Google sucks for Usenet, but not smart enough to figure out what to do about it? That puts your IQ somewhere between "pomegranate" and "wire-haired terrier".

My ISP gets its newsfeed from Supernews. A couple months ago, I got tired of SN telling me which groups I could and could not cross-post. So, I took \$7.95 of my hard-earned money, and I bought 8 GB of OctaNews access with it. At my current rate of use, that will last me approximately 6 1/2 YEARS.

In case I haven't been clear enough for you, my sympathy for your Google travails is going to be "extremely limited", to put it mildly. In case I STILL haven't been clear enough, get yourself a decent news provider, or shut the fuck up, unless you're prepared to claim that you can't afford TEN FUCKING CENTS A MONTH.

"Borg clone" that, you fucking drama queen.

P.S. – Your obsessions with sperm, peckers, and "butt-cheaks" may be trying to tell you something.
