It has tunnels like blood vessels. Its heating comes from inside the planet.

Like roots, some places have 8 or more tunnels running/rolling together.

A life organism, a plant, the size of the planet that brings warm and life to bacteria and other life forms. Perhaps a result of genetic manipulation by aliens to establish life on Europa. They use biological means, and their host planet plant to move in.

There was sign of aliens, the reaction was that why would aliens travel 7 million lightyears to just turn back? The answer is they need a home.

What are the chances of two caves running in parallel? For thousands of kilometers? Wouldn't this suggest the possibility of life being involved?

CHICAGO, Illinois (AP) — — Federal officials say it was probably just some weird weather phenomenon, but a group of United Airlines employees swear they saw a mysterious, saucer-shaped craft hovering over O'Hare Airport in November.

The workers, some of them pilots, said the object didn't have lights and hovered over an airport terminal before shooting up through the clouds, according to a report in Monday's Chicago Tribune.

The Federal Aviation Administration acknowledged that a United supervisor had called the control tower at O'Hare, asking if anyone had spotted a spinning disc-shaped object. But the controllers didn't see anything, and a preliminary check of radar found nothing out of the ordinary, FAA spokeswoman Elizabeth Isham Cory said.

"Our theory on this is that it was a weather phenomenon," Cory said.

"That night was a perfect atmospheric condition in terms of low (cloud) ceiling and a lot of airport lights. When the lights shine up into the

Europa is a Star Trek planet that is alive (the discovery of life elsewhere)

clouds, sometimes you can see funny things."

The FAA is not investigating, Cory said.

United spokeswoman Megan McCarthy said company officials don't recall discussing any such incident from November 7.

At least one O'Hare controller, union official Craig Burzych, was amused by it all.

"To fly 7 million light years to O'Hare and then have to turn around and go home because your gate was occupied is simply unacceptable," he said.
