Part of a solar system orbiting the Sun and has Moons.

Say taking Jupiter's Europa and sending it into space away from our solar system. It was a Moon of a 'Planet'. Now it is an icy object in space, heading away from our solar system and possibly ending up caught up gravitationally one day in some solar system 7 million light years away.

Astronauts in the future encounter this icy object in deep space, and not recognizing that it is a Moon that came from Jupiter's orbit they set foot on it and call it a solo planet in space.

Planets define themselves.

Pluto being part of our solar system and having Moons overwhelmingly defines itself as a planet, even if it would separate from our solar system one day it would remain a Planet.

The argument that a planet is not a planet if it is not bound to a solar system and have not cleared its' own path is wrong.

Humanity seems to be brainwashed by unknown powers.

No joke.

The corruption is that advocacy, a Republican phenomena makes its violent blackmailing force present in all corners of Earth, in science, in health, everywhere. It is the corruption of the 21st century.

Advocacy in the USA is especially present in public US schools, advocating success for kids. It is the mentality of private schools but applied in the United States in all schools.

Advocacy is what made Ceausescu dominant.

Turning public schools into private schools violates

Pluto, an excluded planet with Moons in a Solar System of Rights. Rights will solve healthcare.

Democracy.

It is a horrible crime, but dumb, as Bush turning state into a private-owned entity, Bush himself crossed the pictures of killed terrorists in his own office. Running other people's lives is religious and barbaric and violates basic human rights. It is simply not Bush's job to cross pictures of killed terrorists, but the arrogance is unstoppable. Bush hails police-America and is a criminal, but never gets it of course.

The phenomena is what is described as racist and brainwashed and barbaric. Not that success is bad, but mandation of that mentality is 18th century, out of date and inappropriately violent, like Ceausescu. Its an illness, a crime, a wrongness that seems to be overly obsessed and criminal, as the whole US government today represents.

Bush is erecting a model Iraq today, a country better than Arabs. Supremacy and racism has always been the primary corruption in the American history.

A mentality that demands a Ceausescu world of loyalty to power, Democracy turns symbolic and treated as a model 'Roman' Democracy of power than a real one, crimes against humanity finds its natural pagesh in history.

Bush: "Here in Washington we have twonny shiksh pagesh proving Shaddam harbored terrorists, now we have enen more pagesh proving IRAN harbors terrorists."

In other countries presidents who conspire ONCE are removed from power, but in the USA the kkk is where one finds it... give Bush a burning cross, American skinhead retard.

Just take Bush's dumbness and what his expectations as invincible created. 80-90 percent of Arabs now think negatively of Americans, while in the past Arabs thought positively of Americans. The USA went from being the most popular country with skateboards and basketball stars in the world to become the world's most hated country.

Racism was not part of the American Success Story, but supremacy and racism took its global toll under Bush. Supremacy and racism was always the #1 corruption in US government history.
