cannot take  
it.

Now listen to me! Did you  
know, that big brother is a  
repression,  
did you know that Google is  
obsessed, insane, with big  
brother and  
piracy having gone  
confiscating, AND

did you know, that there is  
no real Sir John Google on a  
horse? You  
can't hear that, no no no.  
Hush it away.

It must be dignity of an  
agent who should be  
promoted. Here cyber  
means militancy and order,  
here cyber means inquiry  
and confiscation  
of rights. Here, people are  
nothing!

Goooooogle.

Big brother, dark dark dark  
dark dark daaaaaaaaaaark.

Spookyfuck, your brain is mine. I crunch your  
bunker. I crunch your  
life. I don't need to watch you for that, I  
don't watch men.

Re: Google and big brother terror piracy

Do you know the quality of psychopaths? Black eyes. It is also the quality of terrorists, and that is how you want the spooooook. Publicity and terror and a sense of that. A sense of crippling madness applied over a man who does not Google, and who does not watch other men at all times.

Hitler had ambitions. Hitler had a derranged way to deal with those who mentioned the word Google. I mean Hitler had a derranged way, and Hitler had a way to deal with those who are in a sense of North Korea today, not wearing pins of their two great leaders in the streets at all time, symbolizing Google, as longitude and latitude, everything that big brother likes, and big brother, no we can't say, YES, Sir John Google on a horse will come and erect the fascist into a knight for his dark business that he knows very well how to take care of.

But the corner arose, yes I am talking of a room corner.–

A strange way to deal with those who were not mentored to be Google addicts and how can they be taken seriously, other than expressing a certtain seriousness within to dig up a person's life and feel no shame. To stalk a person and like in Abu Ghraib believe that because 100 others do it, it's how it is.

It happens that way that you are suspicious, that you feel everly powerful, of course. You do that. How could 100 fail you and not be over me for me mentioning Goooooo goo goo goo goo. Goo gee. For big brain washington there is longitude and latitude, a zero hour global accordance to big brother, and for everything else there is Google, fascism.

And so, I messed with your world, with your Google Earth, Mr. Spookyfuck nazi. Can you take the word nazi? Can Google take it?

Google is a Nazi, and you're a sour criminal.

Crime crime big brother crime, must excercise caution. The world must know all his email addresses he ever used on the Internet.

It is called stalking, and schizophrenia.

Re: Google and big brother terror piracy

It is. But. You don't know how many people laugh at you, how many jokes you represent to the world. Not that what Hitler did was entertaining.

How does it feel to follow people in the dark and be like Google in corporate mentality?

Continue exercising caution. The world of yours is in danger, and you must know everything.

Paranoid schizophrenia, served on a plate of a cannibal.

Imagine the man in the dark following people, collecting information and passing on that information to the big brother. Except, there is no real Sir John Google on a horse, but for you it doesn't matter.

Ever wondered about 1941?

Would you like me to beat your head in a wall one day?
