When  
Big

rules  
in  
ways  
not  
in  
other  
countries.

Or  
should  
it

a

simply  
a

always  
look

And

life. I don't

Do you know the quality of  
psychopaths? Black eyes. It  
is also the  
quality of terrorists, and that  
is how you want the  
spooooook.  
Publicity  
and terror and a sense of  
that. A sense of crippling  
madness applied  
over a man who does not  
Google, and who does not  
watch other men  
at all times.

Hitler had ambitions. Hitler had a derranged  
way to deal with those  
who mentioned the word Google. I mean  
Hitler had a derranged way,  
and Hitler had a way to deal with those who  
are in a sense of North  
Korea today, not wearing pins of their two  
great leaders in the  
streets  
at all time, symbolizing Google, as longitude  
and latitude, everything  
that big brother likes, and big brother, no we  
can't say, YES,  
Sir John Google on a horse will come and  
erect the fascist into  
a knight for his dark business that he knows  
very well how to take  
care of.

But the corner arose, yes I am talking of a  
room corner.—

## Re: Google and big brother terror piracy

A strange way to deal with those who were not mentored to be  
Google addicts and how can they be taken seriously, other than  
expressing a certain seriousness within to dig up a person's life  
and feel no shame. To stalk a person and like in Abu Ghraib believe  
that because 100 others do it, it's how it is.

It happens that way that you are suspicious, that you feel  
everly  
powerful, of course. You do that. How could 100 fail you  
and  
not be over me for me mentioning Gooooooooo goo goo goo  
goo goo.  
Goo gee. For big brain washington there is longitude and  
latitude,  
a zero hour global accordance to big brother, and for  
everything  
else there is Google, fascism.

And so, I messed with your world, with your Google Earth,  
Mr.  
Spookyfuck  
nazi. Can you take the word nazi? Can Google take it?

Google is a Nazi, and you're a sour criminal.

Crime crime big brother crime, must excercise caution. The  
world  
must know all his email addresses he ever used on the  
Internet.

It is called stalking, and schizophrenia.

It is. But. You don't know how many people laugh at you,  
how many  
jokes you represent to the world. Not that what Hitler did

Re: Google and big brother terror piracy

was  
entertaining.

How does it feel to follow people in the dark and be like  
Google in  
corporate mentality?

Continue exercising caution. The world of yours is in  
danger, and  
you must know everything.

Paranoid schizophrenia, served on a plate of a cannibal.

Imagine the man in the dark following people, collecting  
information  
and passing on that information to the big brother. Except,  
there  
is no real Sir John Google on a horse, but for you it doesn't  
matter.

Ever wondered about 1941?

Would you like me to beat your head in a wall one day?

I'll do it on your sacred Google corporate wall, it is black and  
white, but we can play a game of color you color blind fucking  
historical neurofuck Hitler, in your sacred paranoid schizophrenic  
world.

It takes time to decide when one feels stalked online on deciding  
what needs to be done. I am Hungarian. I don't go to court. And it  
can get bloody as you are in your darkest exotic nature. Google.

Extraterrestrial. I said it. Big brother is not even scary any more.  
Extraterrestrial.
