: >> surface of Earth, the surface bends which creates magma.

:

: >What a load of absolute bollocks.

: >cheers

: >Bill

:

: I wonder why he hasn't claimed that it can be found on Jupiter, Saturn,
and

: Mars, all of which rotate with a speed similar to (or quite a bit
faster
than)

: the rock we're sitting on...

Jupiter and Saturn are gas giants, Mars has two very small moons.
If you don't know what effect our Moon has on Earth spend a
day in the Bay of Fundy or the Bristol Channel and watch the
tides. The same force that makes water rise and fall in our oceans
also acts on the lithosphere, and a jacuzzi full weighs a ton.

Re: why does Earth and lo have magma?

The total prat "Bill" is a load of absolutely useless ignorant bollocks and you are just another sucker taken in by the troll.
Cheers,
Androcles

Well, I'm still confused.

That Androcles moron is enough to confuse you. Just ignore him and you won't be confused.
Just read any of the many standard university level geology texts and you'll realise he's an ignoramus.
And he's forthright in his ignorance.
cheers
Bill
