I

a
hacker,

they

They were
like babies,
doing
everything I
told
them.

Basically I talked to the sect
owner directly through his
computer's
speakers.
He didn't dare to touch his
computer and shut down the
sect
immediately.
I swear to God that was the
story.

All he heard is FBI FBI with his Chinese
ears.

Don't let me install my Windows OS that I wrote myself ever
again.

I remember my talk.

Make sure you tell the FBI. I'm a cannibal. I eat people. The only
reason
I eat HYOOOMANS,

He didn't go away and tried to solve the hacking intrusion for half an
hour.

He was looking at every security detail while I kept talking about the
horrors
sects can do.

I am a Cannibal, I eat people, and I want world war. If you can't keep
me
out with all the newly hired security experts, why don't you just go
home.

I am starting to remember.

If your security people can't protect this place from me, why don't you just go home. He kept sending letters of a hacker.

You know the funny thing. I didn't hack in. I left a two months old connection alive. It's complicated. I did nothing, but use their site's features. I never had to use my Windows OS. When I left an old connection alive for chatting, somehow all the security features didn't apply to that one connection. I figured it out at that moment of what was happening, that they never rebooted their server and the new server security tools didn't block an already connected and live connection. I figured, the moment I log off, there is no back in to speak with security. I held the connection till the last moment of their security finding out what was happening. They hired a very aggressive security after my first two attempts to speak of human rights with them. They quit. Closed down the place. And I was like, is that possible? I wasn't expecting that. They had a monster hacker in their minds, speaking horrors and blood of a cannibal who is not a human rights activist and wants world war.
