They  
were  
like

Basically I  
talked to the  
sect owner  
directly  
though his  
computer's  
speakers.  
He didn't  
dare to  
touch his  
computer  
and shut  
down the  
sect  
immediately.  
I swear to  
God that  
was the  
story.

All he heard is FBI FBI with  
his Chinese ears.

Don't let me install my Windows OS that I  
wrote myself ever again.

I remember my talk.

Make sure you tell the FBI. I'm a cannibal. I eat people. The only reason I eat HYOOOMANS,

He didn't go away and tried to solve the hacking intrusion for half an hour.

He was looking at every security detail while I kept talking about the horrors sects can do.

I am a Cannibal, I eat people, and I want world war. If you can't keep me out with all the newly hired security experts, why don't you just go home.

I am starting to remember.

If your security people can't protect this place from me, why don't you just go home. He kept sending letters of a hacker.

You know the funny thing. I didn't hack in. I left a two months old connection alive. It's complicated. I did nothing, but use their site's features. I never had to use my Windows OS. When I left an old connection alive for chatting, somehow all the security features didn't apply to that one connection. I figured it out at that moment of what was happening, that they never rebooted their server and the new server security tools didn't block an already connected and live connection. I figured, the moment I log

off,  
there is no back in to speak with security. I held the connection till  
the  
last moment of their security finding out what was happening. They  
hired  
a very aggressive security after my first two attempts to speak of  
human  
rights with them. They quit. Closed down the place. And I was like,  
is that possible? I wasn't expecting that. They had a monster hacker  
in  
their minds, speaking horrors and blood of a cannibal who is not a  
human rights activist and wants world war.

They were an empire, they weren't just a sect. Their own tools they  
built they couldn't trust no more and their own tools murdered them,  
just that lack of knowledge and guessing in the non human domain  
creates monstrosities in their minds. The word hacker, how it  
threatens  
them. Nothing else they fear more than a software engineer.
