Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

HYOOOMANS,

He
didn't
go
away
and
tried
to
solve
the
hacking
intrusion
for
half
an
hour.

He
was
looking
at
every
security
detail
while
I
kept
talking
about
the
horrors
sects
can
do.

I
am
a
Cannibal,
I
eat
people,
and
I

want
world
war.
If
you
can't
keep
me
out
with
all
the
newly
hired
security
experts,
why
don't
you
just
go
home.

I
am
starting
to
remember.

If your
security
people can't
protect this
place from
me, why
don't
you
just go
home. He
kept
sending
letters of a
hacker.

You know
the funny
thing. I
didn't hack
in. I left a
two months
old
connection
alive. It's
complicated.
I did
nothing, but
use their
site's
features.
I never had
to use my
Windows
OS. When I
left an old
connection
alive for
chatting,
somehow
all the
security
features
didn't apply
to that one
connection.
I figured it
out at that
moment of
what was
happening,
that they
never
rebooted
their server
and the new
server
security
tools didn't
block
an
already
connected
and live
connection.
I figured,
the moment

I log
off,
there is no
back in to
speak with
security. I
held the
connection
till
the
last moment
of their
security
finding out
what was
happening.
They
hired
a very
agressive
security
after my
first two
attempts to
speak of
human
rights with
them. They
quit. Closed
down the
place. And I
was like,
is that
possible? I
wasn't
expecting
that. They
had a
monster
hacker
in
their minds,
speaking
horrors and
blood of a
cannibal
who is not a
human
rights
activist and
wants world

war.

They were an empire, they weren't just a sect. Their own tools they built they couldn't trust no more and their own tools murdered them, just that lack of knowledge and guessing in the non human domain creates monstrocities in their minds. The word hacker, how it threatens them. Nothing else they fear more than a software engineer.

It is their domain that defines the world today. A cyber-terrorist in all US dictionaries refers to hackers.

A real cyber-terrorist is just like a real terrorist who takes people hostage, threatens, and murders people viciously as terrorists online.

The global perception of what cyber is is completely deformed from reality.

It is such people as them who are committing crimes of terrorist-identity, threat psychos online, Booglebushes. The world is not evolved.

Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

However the UN perceives cyber terrorism differently already and treats it as real crimes as any other that correspond with crimes against humanity under true terroristic religious hatred and/or political pervasiveness.

It is the way human rights operates. I would never write code to break in anywhere but speak the truth on matters of human rights, but since all perception is dilirious and not responsive, I say: I must be a cannibal who eats people and want world war. Americans buy such stories, and so do hardline sects.

"I am a cannibal, I eat people and I want world war" comes from the CIA being after me in 2003 when a letter I wrote made the CIA claim that I wanted World War and must be watched. I noted a think in a letter I wrote to a city that in Europe if a city would be in private hands by an owner such as in the giant Suburb official city I live in, in Europe people would start world war. Europe has culture and such things cannot fall in the hands of one owner as in times of Kings. Google commits the same atrocities when taking full possession of 15 million international books through piracy (not checking for copyright and copying these books for profit). Some things cannot be privatized for business by assuming they are free in libraries. People get access to old books in libraries. These 15 million books are a 153 billion worth of business assets for Google at the least. Those books have owners, and copyright law must apply for profiting off of those copyright protected works. By running a profit scheme on all of humanity's culture through criminal business treatment of these materials, ... well let's move on to Google with the human rights affairs.

Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

No, I wouldn't say I have become a cannibal of human rights affairs,
I am not a human rights activist. I am a cannibal, I eat people. And
this
is my world war.
