Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

sending  
letters  
of  
a  
hacker.

You  
know  
the  
funny  
thing.  
I  
didn't  
hack  
in.  
I  
left  
a  
two  
months  
old  
connection  
alive.  
It's  
complicated.  
I  
did  
nothing,  
but  
use  
their  
site's  
features.  
I  
never  
had  
to  
use  
my  
Windows  
OS.  
When  
I  
left  
an  
old  
connection  
alive  
for

chatting,  
somehow  
all  
the  
security  
features  
didn't  
apply  
to  
that  
one  
connection.

I  
figured  
it  
out  
at  
that  
moment  
of  
what  
was  
happening,  
that  
they  
never  
rebooted  
their  
server  
and  
the  
new  
server  
security  
tools  
didn't  
block  
an  
already  
connected  
and  
live  
connection.

I  
figured,  
the  
moment  
I  
log  
off,  
there

Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

is  
no  
back  
in  
to  
speak  
with  
security.  
I  
held  
the  
connection  
till  
the  
last  
moment  
of  
their  
security  
finding  
out  
what  
was  
happening.  
They  
hired  
a  
very  
agressive  
security  
after  
my  
first  
two  
attempts  
to  
speak  
of  
human  
rights  
with  
them.  
They  
quit.  
Closed  
down  
the  
place.  
And  
I  
was

like,  
is  
that  
possible?  
I  
wasn't  
expecting  
that.  
They  
had  
a  
monster  
hacker  
in  
their  
minds,  
speaking  
horrors  
and  
blood  
of  
a  
cannibal  
who  
is  
not  
a  
human  
rights  
activist  
and  
wants  
world  
war.

They  
were  
an  
empire,  
they  
weren't  
just  
a  
sect.  
Their  
own  
tools  
they  
built

they  
couldn't  
trust  
no  
more  
and  
their  
own  
tools  
murdered  
them,  
just  
that  
lack  
of  
knowledge  
and  
guessing  
in  
the  
non  
human  
domain  
creates  
monstrocities  
in  
their  
minds.  
The  
word  
hacker,  
how  
it  
threatens  
them.  
Nothing  
else  
they  
fear  
more  
than  
a  
software  
engineer.

It is their  
domain that  
defines the  
world

today. A  
cyber–terrorist  
in  
all US  
dictionaries  
refers to  
hackers.

A real  
cyber–terrorist  
is just like a  
real terrorist  
who takes  
people  
hostage,  
threatens,  
and murders  
people  
viciously as  
terrorists  
online.

The global  
perception  
of what  
cyber is is  
completely  
deformed  
from  
reality.

It is such  
people as  
them who  
are  
committing  
crimes of  
terrorist–  
identity,  
threat  
psychos  
online,  
Booglebushes.  
The world  
is not

Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

evolved.

However  
the UN  
perceives  
cyber  
terrorism  
differently  
already and  
treats  
it as real  
crimes as  
any other  
that  
correspond  
with crimes  
against  
humanity  
under true  
terroristic  
religious  
hatred  
and/or  
political  
pervasiveness.

It is the way human rights  
operates. I would never  
write code to break  
in anywhere but speak the  
truth on matters of human  
rights, but since  
all perception is delirious  
and not responsive, I say: I  
must be a  
cannibal  
who eats people and want  
world war. Americans buy  
such stories, and  
so do hardline sects.

"I am a cannibal, I eat people and I want  
world war" comes from the  
CIA  
being after me in 2003 when a letter I wrote

Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

made the CIA claim that I  
wanted World War and must be watched. I  
noted a think in a letter I  
wrote to a city that in Europe if a city would  
be in private hands by  
an  
owner such as in the giant Suburb official  
city I live in, in Europe  
people  
would start world war. Europe has culture  
and such things cannot fall  
in the hands of one owner as in times of  
Kings. Google commits the  
same atrocities when taking full possession  
of 15 million  
international  
books through piracy (not checking for  
copyright and copying these  
books for profit). Some things cannot be  
privatized for business by  
assuming  
they are free in libraries. People get access to  
old books in  
libraries.  
These 15 million books are a 153 billion  
worth of business assets for  
Google at the least. Those books have  
owners, and copyright law must  
apply for profiting off of those copyright  
protected works. By running  
a profit scheme on all of humanity's culture  
through criminal business  
treatment of these materials, ... well let's  
move on to Google with  
the  
human rights affairs.

No, I wouldn't say I have become a cannibal of human rights  
affairs,  
I am not a human rights activist. I am a cannibal, I eat  
people. And  
this  
is my world war.

Wacahar, Mr. Incredible. Wacahar.

Re: Crazy humanity: war against crimes against humanity and racism – or racist monopoly

A security man sits and snores in a chair.

Looking for a security breach with the newly hired security people. They can only conclude that a dangerous hacker broke in in Mission Impossible. Panicking from wacahar. FBI, FBI they hear, they are not listening, they are panicking. And shutting down the sect forever. A man speaking of cannibalism echoes in their minds. An empire that arose as the largest on the net in the world, and sold everything sect vanished without a headline.

Wacahar. Ran by the summa cum laude nobel prize revolutionary front, gangsters, spray painters, political posters. Rebels, psychos, murderous criminals, hackers, activists.
