Everything is about timing,
and Bush knows that.

When Hungary opened borders for East
Germans and broke an old
agreement
that blocked East Germans access to the
West, East Germany didn't
stand
as Bush that such acts are considered an act
of war from Hungary's
side
against East Germany. Young people acted
in days and finished the job.

Re: It is all about slavery. Virtual slavery. Orwell's book was about slavery. Dictatorships are slavery. Republicans are a racist

East Germany would have banned exit completely to East Germans. The idea of East and West was completely flawed now. That was the idea of hard-line systems to keep the system without flaws, and flaws were not allowed and a passport system was in place, and in larger places like in Russia maintained even between cities.

typo: Soviet Union, not Russia.

Bush doesn't like change. He has that face. Changes give rise to flaws. Bush many times reminded the world during the Iraq war that the United States will not change and he is head.

Flaws. Flaws are what schools teach us against. Our flaws are filled in. I have a Summa Cum Laude.

Part 2:

It is that way, that in parts of the world where people are tall, culture develops for tallness. Serbia has the world's tallest people, and basketball is part of their culture as among black people in the United States. Characteristics of the body shape culture.

Neanderthals, our brother species who separated from homo sapiens 700 thousand years ago had large muscular body characteristics and they worshipped facing animals in a hand to hand wrestle. They died out around some 28 thousand years ago. They had very similar back and neck injuries found among cowboys and bullfighters in the USA today.

It is that way, that in parts of the world where people are short, culture develops for shortness, but more interestingly one sees extremes as the art of fat fighting among Sumo wrestlers. Fat people are not found

to be wrestlers or fighters in general, but Japanese culture introduced Judo and Sumo where overweight people learn to utilize their excess weight as a form of martial arts.

One of my questions in this book is to try and predict how body characteristics can change in the next one million years, and arriving to a special 6 meter tall women who is a professional swimmer, and of course wins all swimming championships.

Ok, let's stop for a moment. It turns out for some, who proclaim themselves perfect, they turn out to be none other than psychotic terrorists. To degrade one another and profit with blackheart off a deliberately scummed humanity. What do they do? They proclaim as Kings, then engage in simple labeling and terrorizing in an ignited rage of attack, look down on what seems to be him and the enemies as a class, but the enemy can arise anywhere, and the claims seem to be of an unrecognized nature and unrecognized power beneath those claims, a pursuit of barbarism, pains induced, a man is seen hurting, molesting someones with radical extremism spilling from his mouth and he proclaims over and over that he is perfect and the situation should be believed. What do people believe, the molested or the molestor? In case the molested is a dictator like Saddam, crowds barbarically bow that yes, such claims are of greatness, others say history has seen such barbaric erection in days of World War II where a King proclaims supremacy, and those part of the cult apparently must agree that what the King chooses must be accepted. And the opposition party discovers a must walk the line and drop the vote aspect and sits for no reason with a gas mask when alone.
