It appears that Google is fighting a losing battle against spammers who have been notoriously abusing the free "Google Groups" posting host.

I can't prove it, but I suspect Google is getting payola for permitting the spam to flow on USNET. I believe this because they somehow manage to filter most of the spam out of another service they offer, (Google Mail).

I really appreciate Google Groups, but I have lost all patience for the spammers who have flagrantly abused their posting host services.

Re: UDP \*googlegroups\*

Therefore, with much regret, I have  
universally UDP'd "googlegroups",  
and all replies to their threads which contain  
said reference to wit:

You're part of a growing movement. \*Many\* people are  
adding universal  
filters to their newsreaders to kill Google groups. My reader  
allows me  
to filter on the message headers. I drop ALL messages with  
'google' in  
the Message-ID line.

Messages originating from Google no longer appear in the  
groups that I  
browse. I miss some relevant posts, but the huge decrease in  
spam and  
miscreant postings more than makes up for it.

There are add-on filters for some of the popular readers that  
can't  
filter on specific header lines. (Like Outlook Express and  
Thunderbird)..

The web page below has methods for various news readers to  
killfile ALL  
messages from Google groups.

[http://improve-usenet.org/filters\\_bg.html](http://improve-usenet.org/filters_bg.html)

I don't know how old this site is but it says "FreeAgent and Agent  
also cannot filter on the Message-ID header." That's not correct.  
Agent (expression language) allows filtering on any line in the header  
including the Message ID.

Re: UDP \*googlegroups\*

Appreciating the administrative cold rogue Gooogle, not that we didn't have enough of CCCP and racist PPPC. Cold rogue imperialism, history's police, big brother, system of cartel godfathers roguing religiouslessly, feelinglessly, discriminately and fascistly in civil rights money having different things in mind for your life.

As Barack Obama said: We don't need cold rogue politics, and I think everybody agrees with that.

How discriminations and kill files and all those things come up with Gooogle!

Racism stinks. Cartel mobs seen as protectors.
